
AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

48. (currently amended) A method of copying and pasting text from a second window to a first window in a windowed computing environment having voice recognition, comprising:

setting input focus on the first window;

while input focus is on the first window, receiving a copy speech command from a user, and in response to the copy speech command:

setting input focus on the second window; and

waiting for the user to select text from the second window;

when the user selects the text from the second window, performing the following steps independent of user input:

copying the selected text;

switching focus back to the first window; and

pasting the selected text into the first window.

49. (original) The method of claim 48 wherein the second window is an Internet browser window of an Internet browser application.

50. (original) The method of claim 48 wherein the second window is a help window of a help application.

- 51 (new) A computer program embodied on a computer readable medium, the computer program for copying and pasting text from a second window to a first window in a windowed computing environment having voice recognition, the computer program comprising code segments for:
- setting input focus on the first window;
 - while input focus is on the first window, receiving a copy speech command from a user, and in response to the copy speech command:
 - setting input focus on the second window; and
 - waiting for the user to select text from the second window;
 - when the user selects the text from the second window, performing the following steps independent of user input:
 - copying the selected text;
 - switching focus back to the first window; and
 - pasting the selected text into the first window.
- 52 (new) The computer program embodied on a computer readable medium of claim 51 wherein the second window is an Internet browser window of an Internet browser application.
- 53 (new) The computer program embodied on a computer readable medium of claim 51 wherein the second window is a help window of a help application.
